

The FCC should reject the NAB's petition 04-160. The satellite radio companies should be permitted to offer their programing including the traffic and weather reports. They are extremely helpful when I am travelling. I pay for these services and I do NOT want them legislated away. The " standard" radio stations are for the most part owned by a few large corporations who are are not the least bit interested in the needs and requirements of their customers, but only want the all mighty dollar.

Thank you in advance for your help

E.W. Graham
